# IFY

Our IFY has been designed to use with our IFY

Producing a fine fog similar to our IFY which can be applied to your hands, face, body as well as all surfaces. The kindest, most effective treatment for your skin and body. Suitable for all skin types. Kind to our planet, kind to our skin.

They are portable, convenient & simple to use, cost effective, sanitise, and destroy bacteria and viruses, help cleanse the skin while on the go & combat maskne.

**+ Effective** – Kills 99.99% of all viruses, bacteria and germs

**+ Eczema, Psoriasis and Flaking** – HOCl is an excellent cleanser and has been known to potentially help with Eczema, Psoriasis, and flaking. It has also been known to benefit skin cells by providing a rejuvenating and hydrating effect

**+ Anti-microbial and Anti-Inflammatory** – HOCl also has Antimicrobial and Anti-Inflammatory properties, which can help to reduce redness and itching.

**+ Naturally Healing** – HOCl supplies cells with oxygen which helps the natural healing processes.

**+ Acne & Sensitive Skin** – By repairing damage to the skin and soothing the skin, HOCl breaks up the bacteria groupings, leading to fewer flare ups, protecting sensitive skin and assisting in the fight against Acne.

**+ Integral ingredient in the Beauty Industry** – Used for post procedure for microdermabrasion, chemical peels & laser treatments. HOCl really is an integral part of beauty treatments in the beauty industry.

**+ NHS, Hospitals – Burns and Scarring** – HOCl is also used in hospitals for wound care as well as for burns and scarring.

**+ Recommended by the US EPA** – Recently the US EPA (United States Environmental Protection Agency) has recommended HOCl as a chemical that kills Covid 19.

**+ Bacterial and viral conjunctivitis** – HOCl is a natural, gentle way to eradicate bacteria on and around the eyelids. HOCl has been known to be profoundly effective and well tolerated in cases of bacterial or viral conjunctivitis.

**+ Piercings and tattoo aftercare** – HOCl can also help your skin to recover from tattoos, piercings, micro needling, and even pimple popping.

**+ Pets and Babies** – HOCl is safe on pets and can help babies with things like nappy rash.

## KIND TO YOU, KIND TO OUR PLANET

**MIST- Instant Sanitiser** has been tested in hospital microbiology departments across the world. Tests in independent UK labs prove compliance with all necessary certifications for both human and animal use.

They are made from the highest quality materials, and the body satin finished to give an exquisite feel and performance. Simply unscrew the top of the MIST- Instant Sanitiser.

The units come in two colours (silver and black) they are small enough to fit into a small handbag, inside your pocket or simply leave it in the car or workplace.

HOCl is FDA/EPA/CE approved for skin, food and surfaces contact. This material was proven to be effective not only against Coronavirus but also against harmful pathogens including: E.coli, Salmonella, Covid-19, Listeria, MRSA, Staphylococcus aureus, Klebsiella, Streptococcus pneumoniae, and more.

We can be competitive against most as we make our own laboratory controlled chemical IFY. While there are cleansers, serums and creams featuring the acid available and through your dermatologist, there are few over the counter face and body spray's you can easily buy.
