

AQUA
couleur™

J.A.K. Water Systems Ltd

AQUAcouleur Product Range

Spa Kit containing three 30ml bottles (lagoon, lavender and fuschia), each bottle suitable to colour pools up to 1.5 m3.

Small Pool small bottles of 180ml, especially packaged for ease of use. Each bottle is sufficient to colour 50m3 – 70m3 of water.

Large Pool bottles of 1ltr. Suitable to colour large volumes of water. Each 1Ltr bottle will colour 270m3 of water

Instructions on use

Before - Ideally the chlorine or bromine level in your pool or spa should be lowered in order for the colour to take. The active chlorine level must be between 0.4 and 1.4 mg/l (not stabilised)

You can use **AQUApremio** to prepare your pool for colouring. AQUApremio will enable you to lower your chlorine rate very quickly. It is advisable to add it to the pool water 2 hours prior to use.

Note: circulation and filtration systems must be running.

During - Pour **AQUAcouleur** into one of the skimmers, circulation or filtration systems. A few minutes later, the pool will exhibit its exceptional colour.

Afterwards - After using **AQUAcouleur**, simply 'shock' the water with your usual disinfectant and your swimming pool will return to its natural state in very short time.

AQUA
couleur™

J.A.K. Water Systems Ltd

For pools, spa's and Hottubs

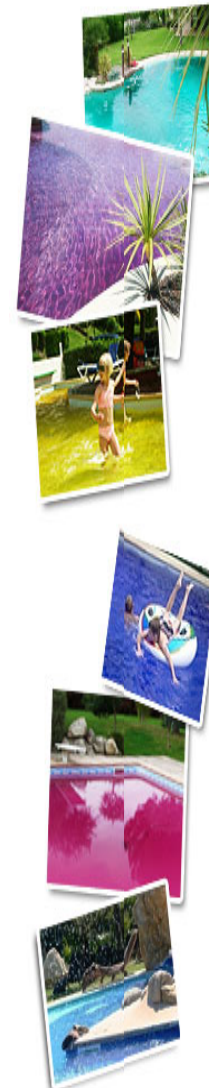

Crystal Clear water doesn't have to be blue; it can be fuschia, turquoise, mango, lavender, lagoon dream or even deep blue.

Aqua Couleur is an easy and completely safe, hypoallergenic way to bring extra fun to your pool. Great for parties and special occasions. Give your pool that extra WOW factor.

Alternatively, the exotic colours will bring back memories of your favourite holidays, accompanied with a sense of well-being and relaxation.

Once you have finished with the colour, simply 'shock' your pool to return it to it's original state – **magic!**

Aqua Couleur is available in a wide range of colours, suitable for every occasion.

Safe and hypoallergenic, Aqua Couleur is ideal for use in all indoor and out door, pools, spas and hot tubs.

The Aqua Couleur range was developed in France by dermatological experts in conjunction with CNRS in Toulouse. Aqua Couleur is hypoallergenic and very safe and simple to use.

Safe

The colourant;

- ✓ Does not discolour fabrics.
- ✓ Does not affect hair colour (even dyed or tinted).
- ✓ Does not affect the quality, balance, or transparency of water.
- ✓ Does not affect the swimming pool equipment.
- ✓ Does not have an adverse affect on health.

Tested

The combination of technical performance and environmental impact of Aqua Couleur has been rigorously tested and passed by the French Health Authority.

Easy to use

Under normal conditions Aqua Couleur products retain the intensity of their colour for between 6 to 24 hours. If you wish to return your pool to it's original state, before this time, simply 'shock' the water, using your usual method.

All Aqua Couleur products do not separate over time, and are appropriate for all types of filtration systems.
